Dear friend and colleague,

I am very pleased to launch a new course that we will be holding in Milan, from 12<sup>nd</sup> to 14th January 2024 organized by the Milan Face Institute Academy: Modern Approach to cervico-mental angle.

The course will be held at MultiMedica Cadaver Laboratory and NH City Life in Milan, Italy.

The first day will be a cadaver lab, where participants will have the opportunity to dissect the lower third of the face and neck region under the guidance of experienced surgeons.

The second day will be live surgery day, where participants will observe me and other faculty members perform facial rejuvenation procedures.

The afternoon session and the last day will contain stimulating presentations, videos and discussions.

Our faculty of five top surgeons will be illustrating the methods that have proved winning choices for themselves and their patients.

Sharing and comparing is the best way to learn, therefore our round table discussions will add to educational aspect and give you the opportunity to learn how to approach this type of surgery.

I am already looking forward to this event and I also hope that you will join us in Milan!

Alessandro Gualdi,  
MD, PhD, Course Director

## Cadaver Lab

12 FRIDAY  
January

8:00-8:30	Registration
8:30-8:35	<b>Welcoming, faculty and course presentation</b> A. Gualdi
